

# WESTERN ROMAN SHADE GUIDE

2024

Roman shades provide privacy, insulation and complete light control. Inspired by the latest trends in soft furnishings, fabric roman blinds are hand finished to the highest standards. Suitable for any area of the home but also practical in offices and other commercial locations.

Roman shades are a more formal and classic style of window coverings but still offer a streamline, clean minimal look. They work by pleating upwards when you want to open and then unfold down to close.

Roman shades offer the fashion of soft drapery while providing privacy and light control.

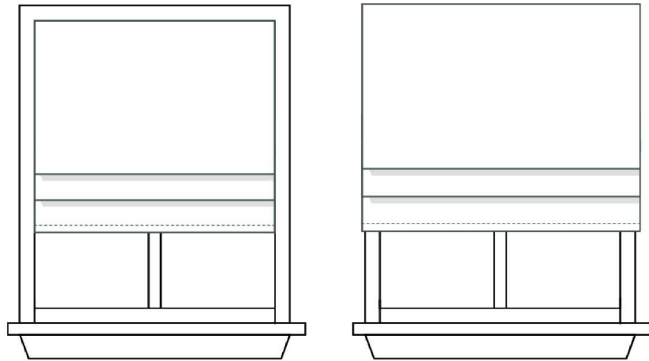

**INSIDE MOUNT**

**OUTSIDE MOUNT**

An inside mount Roman shade sits inside the frame. The look is clean and streamlined and doesn't protrude past the wall.

An outside mount Roman shade sits outside the window on the outside frame or above it. An outside mount can make your window appear larger. If you are working with multiple windows in a room, you can use the outside mount to make all the windows look even in dimension or uniform in height. It is also ideal if you are working with metal frames that you do not want to drill into.

## FLAT STYLE

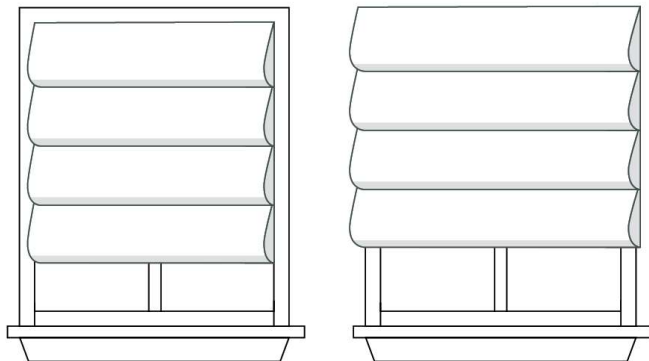

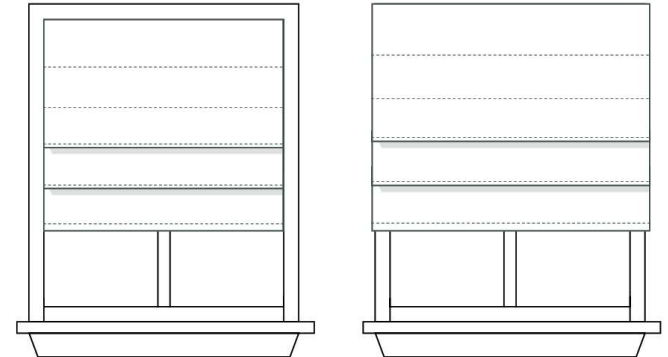

A flat roman is by far the most popular style that we make. When in the closed position, the fabric hangs flat. When pulled open, it stacks neatly with uniform folds.

Style Notes: Classic, Contemporary.

## CLASSIC STYLE

This roman is very similar to the flat roman except that we sew in equally spaced bars into the folds. This adds dimension and visual interest across the face of the shade. We recommend this style for solid fabrics that could use the extra detail. It also helps reduce the pinholes of light if you are choosing a blackout roman.

Style Notes: Tailored, Contemporary.

## HOBBLER STYLE

This style is popular with traditional decorators. It adds full billowing pleats to a roman when it is in the down position. It is a great option if you want to add softness and that finishing touches to windows that are not able to take drapery.

Style Notes: Traditional, Lux.

## STANDARD ROMAN SHADE

Shade material is attached to the back of the head rail. Shade includes a 6" valance to conceal the components. When raised, the material rises from the bottom in flat folds.

Shades operated by cords (cord lock or cord loop) will have controls in front of the shade.

## WATERFALL SHADE

Shade material is attached to the front of the head rail without a valance. When raised, the material rises from the bottom in flat folds. Optional back valance is available upon request.

Shades operated by cords (cord lock or cord loop) will have controls behind the shade.

Valance Without Lining

Valance With LF Lining

Valance With BO Lining

Lined valances are recommended to conceal the head rail components where an open-weave pattern is selected. All Top Down Bottom Up functional shades (TDBU) are made with lined valances as standard.

When a shade is lined the valance is lined in the same fabric.

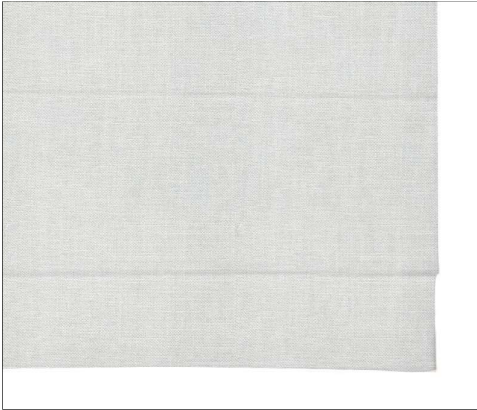

If no lining is selected and the fabric is sheer the components and hardware will show through the fabric. Sheer fabric with no liner is not recommended on Waterfall style shade. If a sheer fabric is selected a standard fold style with a lined valance is recommended to conceal the hardware and components.

To add a lined valance to a shade with no lining there is a surcharge.

## HEMS

Standard bottom hem: Double folded at 3 1/2" wide. Back of the shade is the same as the main body fabric.

Lining can be added at the bottom hem. It is 1/2" up from the bottom. Seen out of the window, back of shade is all white. This is optional and will be charged \$15.00 extra.

Front of Shade  
3 1/2" bottom hem and 1" side hem

Back of Shade  
3 1/2" bottom hem and 1" side hem

Back of Shade  
3 1/2" bottom hem with lining 1/2" up  
the bottom

## RETURNS

Returns are strongly recommended for outside mount shades. Adding returns is for free. Returns length is shorter than valance length considering the stack depth of the shade. Returns are attached to the head rail with connector to create sharp clean corner. For inside mount roman shade with cord back, return is optional.

## STANDARD SPECIFICATIONS FOR ROMAN SHADES

- Standard shades - cords front with a valance.
- Waterfall shades - cords back without a valance. Adding a valance adds a surcharge.
- Cordless or clutch shade is a standard option.
- Head rail is wrapped in the matching fabric.
- Shades are made from bottom to top, and patterns will be matched from the bottom of the shade to the top. Top-down alignment adds a surcharge.

Waterfall Shade  
Cords Back Without A Valance

# ROMAN SHADE STYLE

---

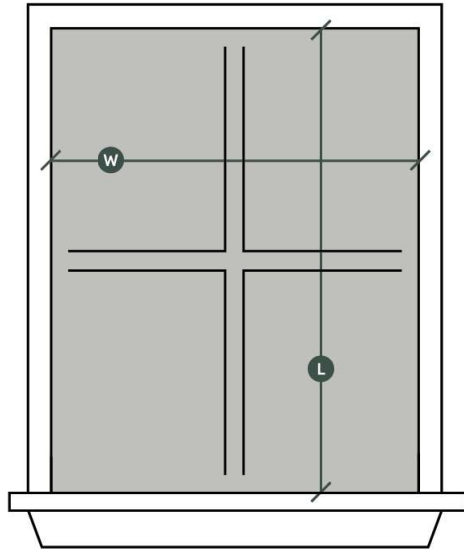

## CONTROL METHOD STYLE

There are five control method styles of Roman Shade to choose from:

1. Manual Cordless System.
2. Manual Clutch System.
3. Motor Control System With Rechargeable Lithium Battery.
4. Motor Control System With Wand.
5. Motor Control System With Alternating Current (A/C).

# HOW TO MEASURE

## INSIDE MOUNT

- The shade will lay between the inside perimeter of the window frame, showing the frame of the window.
- The window frame is more than 2" deep.

### WIDTH

Take measurements from top, middle & top of window frame, always staying on the inside edge. Do not skip this step because most windows are not perfect rectangles. Deductions of 1/4" total are taken off of the width of the shade when ordering inside mount.

### HEIGHT

Take measurements from the left, middle, and right of the window frame, always staying on the inside edge of the window frame. Take the largest number of the three. Do not skip this step because most windows are not perfect rectangles.

## OUTSIDE MOUNT

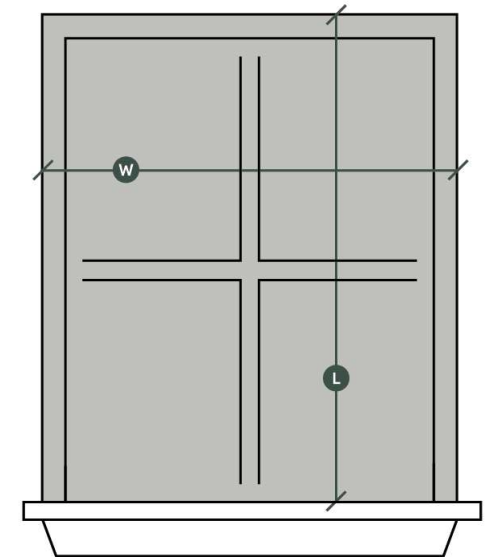

- The window frame depth is less than 1 1/2".
- The window frame is not particularly attractive.
- You plan to create a higher ceiling look by mounting the shades much higher than the window.
- You plan to have blackout roman shades.

### WIDTH

Measure the width you would like to cover. Adding 3" (1 1/2" on each side) is recommended if space allows.

### HEIGHT

Measure the height you would like to cover. A minimum of 1 1/4" flat surface above the window is required for mounting brackets.

**Shade With Light-Filtering Liner**

**Shade With Black-Out Liner**

(Blackout Lining Is A 10% Surcharge)

Shades have light filtering lining and blackout lining. Both linings have white, beige, and gray colors. Blackout lining without pin holes blocks the light through the shades effectively.

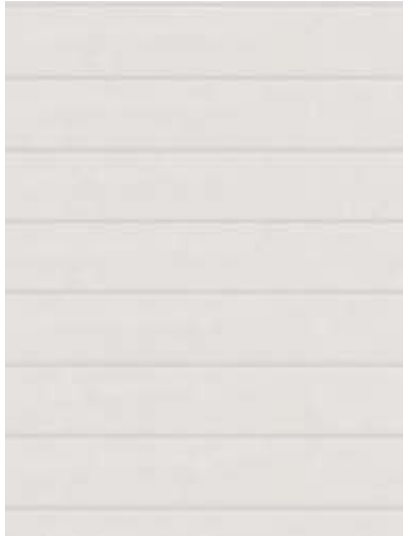

Standard sheer roman shade is lined with sheer. It is also lined with LF lining and BO lining.

**Note:** Some Fabrics may require additional dressing and steaming after installation.

# PANEL ALIGNMENT

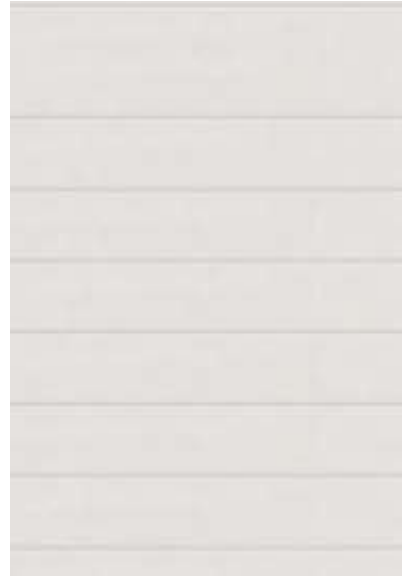

---

## TOP PANEL ALIGNMENT

(SURCHARGE FOR THIS OPTION)

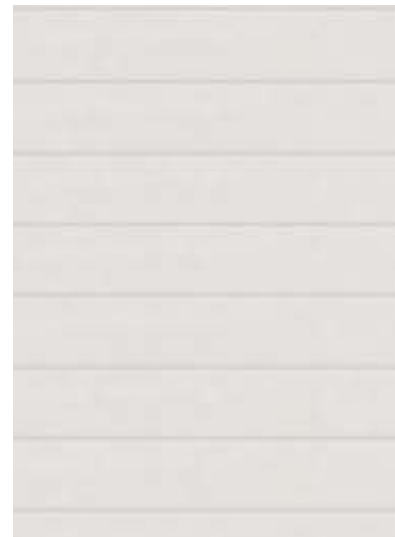

Top panel alignment means panel lengths vary due to the bottom of the panel between side-by-side windows. Shades are lifted with equal pleat space from the top though the lengths are different. Bottom pleat space may not match.

## BOTTOM PANEL ALIGNMENT

(STANDARD)

Bottom panel alignment means panel lengths vary due to the top of the panel between side-by-side windows. Shades are lifted with equal pleat space from the bottom though the lengths are different. Top pleat space may not match.

## TOP DOWN/BOTTOM UP

---

### ROMAN SHADES TOP DOWN / BOTTOM UP FUNCTION

Top-down bottom-up shade are window treatments that can be raised from the bottom, lowered from the top or adjusted from both directions at once.

This upgrade provides added light control, privacy and style over other options.

Cordless Mechanism

## MANUAL CORDLESS SHADES

Cordless shades operate has no lift cords on the front of the shade. The shade is lowered by pulling on the hem bar to the desired shade position. Clear grips are added to the hem bar of cordless shades.

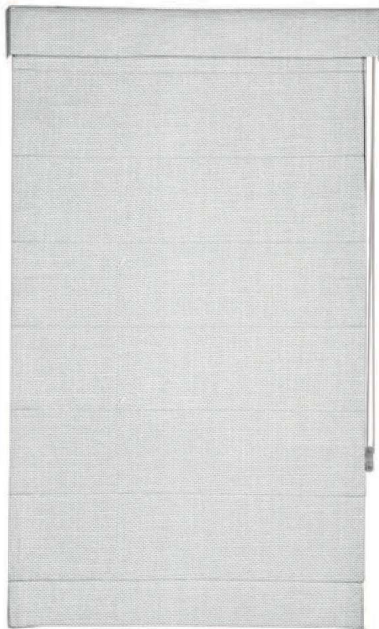

Cordless shades are available up to 96" wide and 96" long mounted on standard depth head rails (see Specifications for details).

### TOP-DOWN BOTTOM-UP CORDLESS SHADES

Top-Down Bottom-Up (TDBU) shades can be raised from the bottom or lowered from the top. Available with attached liners. The maximum width for TDBU shades is 66".

# CONTROLS

---

Standard Clutch Shade  
With Valance

Cord Tensioner  
Always Clear

## CLUTCH CONTROL SHADES

A nylon continuous cord loop on the system help raise the shades. Now the color is white only and length is 2',3',4',5' and 6'. Usually its length is 2/3 of shade height.

A valance is required with clutch control system.

The position of the cord is on the side which may allow the light to come through the gap on the side.

## WAND CONTROL SHADES

Wand control shades are operated by a rechargeable lithium-ion battery motor.

Micro-USB is in the backside of the wand.

4 Wand lengths are available: 24", 36", 48", and 60".

Wand control is available for roman shades with valance. The fabric width is a **little** bit narrower than the valance width to allow for the wand. The position of the wand is on the side which may allow the light to come through the gap on the side.

Wand  
With Power Adaptor

Wand Control Shade

# CONTROLS

---

Remote Control Shade

Remote Motor Head

## REMOTE CONTROL SHADES

### LITHIUM ION BATTERY MOTOR:

- Motor is supported by rechargeable lithium ion battery.
- Micro-USB at the top of rechargeable lithium is easier and safer to access.

### QUIET LITHIUM ION BATTERY MOTOR:

- More powerful rechargeable lithium battery is applied with.
- Micro-USB at the top of rechargeable lithium is easier and safer to access.

### ALTERNATING CURRENT (AC) MOTOR:

- 100V - 240V AC motor with built-in transformer and 2' pigtail.
- Require installation by an electrician.

REMOTE

## SINGLE AND MULTI-CHANNEL REMOTES

Multi-channel remotes have 15 channels. Each channel can control 15 shades.

WALL SWITCH

## SINGLE AND MULTI-CHANNEL WIRELESS WALL SWITCHES

Multi-channel wall switches have 15 channels. Each channel can control 15 shades.

WIFI P-BOX

P-Box allows to link the motorized shades into Internet via WI-FI or Ethernet, enabling control via smart APP on phones / tablets or through Amazon Alexa, Control4, Google Home, IFTTT, RTI, Samsung Smart Things, and Siri Short Cuts.

P-BOX has a range of 100'. For homes with shades on multiple floors, we advise to have 1 P-BOX per floor.

Standard P-BOX is applied with Ethernet cable and power cable.

## CARE INSTRUCTIONS

The packaging and shipping of soft treatments frequently results in minor wrinkling of the fabric. Pls allow the items to hang for a few days so the wrinkles may relax and begin to fall out. There are different characteristics and handling needs for the variety of fabrics that are offered. Use a feather duster, good quality steamer, or vacuum lightly with an upholstery attachment to clean the fabric. Cotton, polyester, cotton/poly blends, and linen may be spot cleaned with warm soapy water using a mild detergent and a clean sponge. Apply to soiled areas and allow to air dry.

Pls locate a professional upholstery cleaning service for more extensive cleaning.

## RECOMMENDED CLEANINGMETHODS

	Fabric Drapery	Fabric Roman Shades	Sheer
Dust			✓
Vacuum	✓	✓	✓
Spot Clean	✓	✓	
Ultrasonic Cleaning			✓

- For spot cleaning on 100% polyester fabrics: use Tide Free & Clear in lukewarm water with white washcloth or white sponge to gently remove spot Blow dry on cool/warm low setting.
- For alertnative dusting: compressed air duster cans may also be used to clear dust or lint in sheer shadings.
- For vacuum: use brush attachment to gently go over surface to remove dust.
- Contact a cleaner from the certified network of ultrasonic cleaners.

# LIMITED LIFETIME WARRANTY

The enclosed product is warranted to the original residential retail purchaser as long as the product remains in the original window.

## **Covered:**

Lifetime: Entire product against manufacturing defects (i.e. a flaw in the product design, materials, or workmanship that causes the product to no longer function).

3 years: All fabric.

2 years: Operation/Functionality, including but not limited to CCL, ladder cords, lift cords and rings. Including internal cords such as those found in cordless shades.

## **Not Covered:**

Normal Wear and Tear

Any product that fails due to:

abuse / exposure to salt air / improper installation / accident / extraordinary use / improper operation / alterations / improper cleaning / misapplication / damage from pests(insects/pets) / improper handling / misuse.

Costs associated with:

product removal / transportation to and from the retailer / brand label removal / product re-measure / incidental or consequential damages / product reinstallation / shipping.

In the event there are multiple blinds/shades in the same room, only the defective blind/shade will be replaced.

## **To Report Shipping Damage:**

If damage occurred during shipping, call and report within 7 calendar days or else you may be denied credit for your damaged product.

## **To Obtain Service:**

If you suspect the product has a manufacturing defect in materials or workmanship:

1. Take a photo of the defect.
2. Email the photo with ORDER # and LINE # to [orders.westernwc@gmail.com](mailto:orders.westernwc@gmail.com).

Any unauthorized claims will not be accepted.

**Warranty Remedy:**

THIS SHALL BE YOUR SOLE REMEDY UNDER THIS LIMITED WARRANTY. If this product is found to have a manufacturing defect in materials or workmanship, we will (at our discretion) do one of the following:

Repair the product / replace the product / refund the cost of the product.

Colors vary from lot to lot and may not exactly match sample swatch or previous purchases.

Discontinued items or color selections will be replaced with the closest equivalent current product.

**YOUR RIGHTS UNDER STATE LAW:**

This lifetime limited warranty gives you specific legal rights, and you may have other rights, which vary from state to state. Some states do not allow limitations on how long a warranty lasts, so the above limitations may not apply to you.

No agent, representative, dealer, or unauthorized employee has the authority to increase or alter the obligation of this warranty. This lifetime limited warranty supersedes any previous versions.

BE A SAFETY SMART WINDOW COVERING CONSUMER  
MAKE CHILD SAFETY YOUR #1 CONSIDERATION  
WHEN SELECTING WINDOW COVERINGS

When the cords/chain loops on window coverings are accessible to young children, a potential strangulation hazard exists.

Any free hanging or exposed cord/chain loops is potentially dangerous.

Cordless blinds & shades, and other solutions are now available to minimize this risk
